***RESTRICTION/ELECTION REQUIREMENT***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-3** drawn to structure of a stator with stator coil winding structural arrangement classified in class 310, subclass 179.
- II. **Claims 4-5** are drawn to production method of a stator with the process of making the stator coil winding arrangement, classified in class 29, subclass 596.

The inventions are distinct, each from the other because of the following reasons:

Inventions in groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different products or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case there are various methods to fabricate a stator including automatic machinery process and/or manual process, wherein each process having various orders of fabricating steps. Also, the method of forming the stator winding in the present invention can be employed to form other magnetic elements such as magnetic sensor, magnetic bearings and magnetic switches which employing electromagnetic windings.

A telephone call was made to the Attorney of Record on 6/29/04 to request an oral election to the above restriction requirement, but the attorney could not be reached; therefore, did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the
